1. How many patients with advanced dementia who get CPR in the hospital survive and leave the hospital?

2. How many patients with un-witnessed cardiac arrest survive CPR?

3. If pneumonia is not treated with antibiotics, does this increase the discomfort level for patients with advanced dementia?

4. Does tube feeding eliminate the risk of aspiration pneumonia for patients with advanced dementia?

NO (if no, why not?)

YES (if so, how?)

LESS THAN 10%

ABOUT A QUARTER (25%)

ABOUT HALF (50%)

ALMOST ALL (MORE THAN 90%)

MOST FROM - Advance Directives Educational Intervention Project Survey - Residents:
5. Which end-of-life planning tool(s) do you know about? (Check all that apply)
   - Do Not Resuscitate (DNR) order
   - Health Care Power of Attorney (HCP/OA)
   - Advance Directive
   - Medical Orders for Scope of Treatment (MOST)
   - None of the above

6. If a patient cannot make medical decisions on his/her own, in which order can the following individuals make decisions?
   - Spouse
   - Majority of patient’s reasonably available parents and adult children
   - An individual with a pre-existing relationship with the patient
   - Legal Guardian
   - Parent or guardian if patient is a minor
   - Majority of patient’s reasonably available adult siblings
   - Attorney-in-fact with power to make health care decisions

7. If you get close to the end of your life and get an infection (for example pneumonia or a skin infection), what treatment makes the most sense to you?
   - Treat the infection with whatever is needed to cure the infection - even if ICU (Intensive Care Unit) treatment is needed
   - Determine at the time if treatment should be given
   - Do not treat the infection, because treating it would only prolong my suffering

8. If you are unable to eat or drink because of being near the end of your life from a terminal illness, would you want intravenous (IV) fluid?
   - Yes, I would want IV fluid to keep me alive as long as possible, even if I’m unconscious
   - Yes, I would want IV fluid, but only if it makes me more comfortable, not to prolong my life
   - No, I would not want IV fluid

**Q2. Have you had an advance directive?**
- Go to an inpatient hospice facility
- Stay at home with family, avoid hospital
- Hydration only and antibiotics
- Stay at home with family, but will go to hospital only for simple treatments such as IV
- Spend last weeks or so in the hospital to be comfortable only
- Spend last weeks or so in the hospital to get all treatments as possible

**Q11. If you knew you only had 6 months to live, what would be your preference?**
- I do not know
- Definitely not
- and severe cognitive impairment
- May be, however, I'll prolonging treatment can be withdrawn if there is a permanent
- May be, however, I'll prolonging treatment can be withdrawn if there is a permanent
- Survival fare
- May be, however, I'll prolonging treatment can be withdrawn if there is low probability
- Probably yes, it's still have a chance to preserve my basic life style
- Definitely yes, just keep me alive by all means

**Q10. If you have a cardiopulmonary arrest, do you wish CPR or intubation?**
- No, I would not want tube feeding
- Yes, I would want tube feeding, but only if it makes me more comfortable; not to
- unconscious
- Yes, I would want tube feeding to keep me alive as long as possible, even if I'm...
13. Are you interested in having MOST form filled out by having advance directives discussed with providers after this section?

- Yes (1)  
- No (2)  

14. What kind of questions were you asked when you discussed advance directives with patients/family?

15. What discussed you from discussing advance directives with patients/family?
